Respect for Life
सम्मान ज़िंदगी का

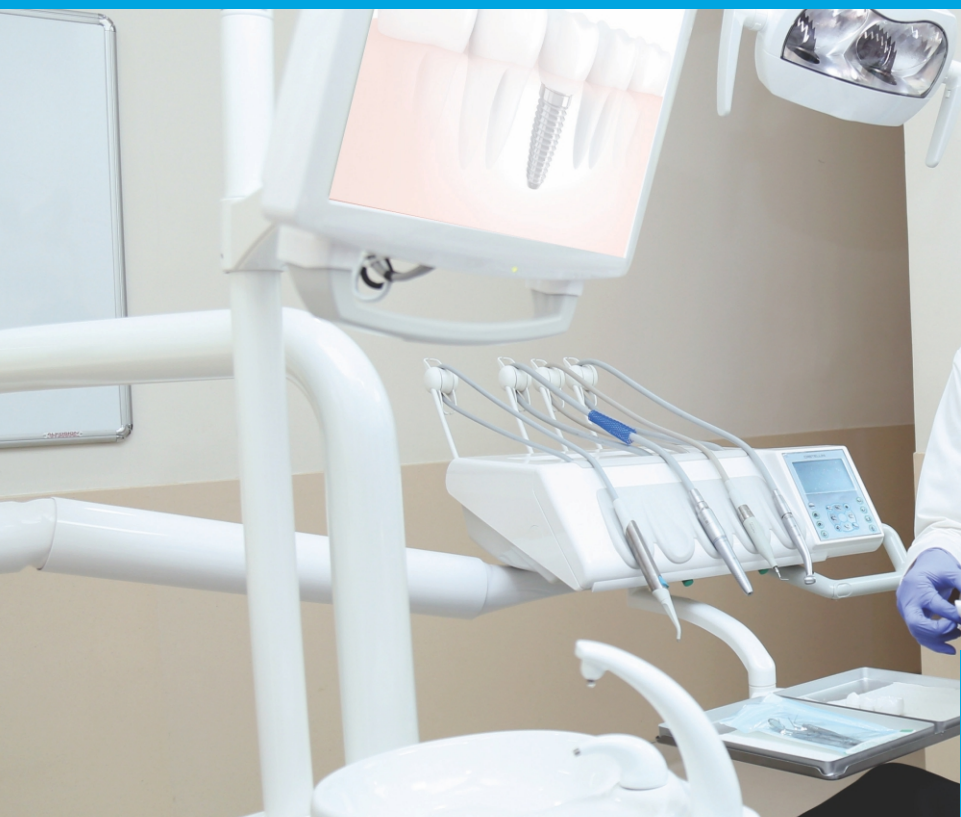

At Sir H. N. Reliance Foundation Hospital and Research Centre, our department of Dental Services offers prevention and treatment of a wide range of oral conditions. We have a highly dedicated team of experienced dental surgeons in subspecialties such as Prosthodontics, Oral and Maxillofacial Surgery, Paediatric Dentistry, Endodontics and Geriatric Dental Care. Our department offers state-of-the-art dentistry in luxurious, relaxing and soothing surroundings.

We take end-to-end dental care with the most sophisticated and modern equipment, keeping up with the mantra - Oral Health is Overall Health. We deliver dental protection at a reasonable cost and that has been kept as our most protected value. We can assure all our clients a satisfactory dental treatment, which will encompass their expectations and our success stories.

Indeed, at Sir H. N. Reliance Foundation Hospital and Research Centre, we don't just treat the body, we go further: we respect life.

DENTAL SERVICES

Level 1, Heritage, 8.00 am - 8.00 pm

SERVICES

Some of the services offered by this speciality include:

- Painless, routine single-sitting root canal procedure
- Treatment of dental abscess, infection and tooth pain
- Acute infection or trauma care
- Temporary filling with an inert, biocompatible material
- Permanent composite filling
- Routine, multiple-visit root canal procedures depending on individual tooth requirements

GERIATRIC DENTAL CARE

This speciality offers dental services for elders. Ageing is associated with physical changes, multiple comorbidities, decline in functional capacity, and intake of multiple medications. Oral health is important for overall health, therefore elders require special dental care. Our dental surgeons have vast experience in providing comprehensive dental care for elder patients.

SERVICES

- Oral and dental hygiene
- Tooth decay
- Gum health
- Loose or missing teeth
- Ulcers in oral cavity
- Dental caries
- Periodontal diseases
- Hypersensitivity
- Xerostomia
- Difficulty in mastication and swallowing
- Burning mouth syndrome
- Facial trauma

PROSTHODONTICS

This speciality deals with treatment, rehabilitation, and maintenance of oral function, comfort, appearance, and health for patients with missing or deficient teeth or tissues. Prosthodontists can replace teeth with implants or dentures and correct misalignment of teeth.

SERVICES

Some of the specialized services offered by this speciality include:

- Routine crown and bridge work including full mouth rehabilitation
- Implant supported solutions ranging from single tooth replacement to full arch implant supported rehabilitation, like hybrids and All on 4
- Tooth / Implant supported overdentures

- Cast partial dentures with precision attachments
- Surgical / Definitive obturators
- Mandibular guide flange prosthesis
- Mouth guards / Temporomandibular joint splints and customized sleep apnea appliances

ORAL & MAXILLOFACIAL SURGERY

This speciality is committed to excellence in the care of patients needing a variety of surgeries of face and jaws. We offer a full range of services to our patients in an attempt to meet their healthcare needs. This speciality prides itself on the incorporation of new technologies into the surgical care of patients, resulting in better outcomes, a safer environment, and improved quality of life for our patients.

SERVICES

- Dentoalveolar surgery
- Excision of impacted teeth, alveoloplasty, radicular surgery
- Facial space infections, Osteomyelitis
- High and low velocity facial injuries, including mandibular, maxillary and orbital trauma treated by internal fixation
- Management of benign tumours and cysts of the jaws & face with immediate reconstruction with grafts and implants
- Correction of jaw deformities
- Correction of cleft deformities
- Reconstruction of the jaws with grafts
- Release of ankylosis of the jaw with reconstruction with costochondral grafts
- Pre-Radiation extractions
- Bone grafts
- Soft tissue grafts
- Orthodontic-related surgery
- Head and neck infection
- Alveolar cleft repair
- Pre-prosthetic surgery

- Paediatric oral surgery
- Obstructive sleep apnea surgery
- Dimple creation
- Botox
- Dental implant procedures
- Sinus lift procedures (direct and indirect)

PAEDIATRIC DENTISTRY

This speciality offers dental services for children. One of the most important aspects of this speciality is the knowledge and training that helps to make the entire dental experience positive, which thereby helps to create a lifelong commitment to good oral health. It is our goal to teach young people to have healthy attitudes and habits so that taking care of their teeth becomes a pleasant experience.

SERVICES

- Preventive dental care
- Dental care for children with special needs
- Fluoride treatment
- Restorative dental care
- Treatment of dental injuries
- Paediatric oral surgery
- Space maintenance
- Preventive orthodontics
- Cosmetic dentistry
- Anaesthesia for children's dentistry
- Diet counselling
- Custom athletic mouth guard

ENDODONTICS

This speciality deals with the diagnosis and treatment of diseases and injuries involving dental pulp and teeth roots. We offer single and multiple-sitting root canal procedures, where root canals are cleaned, shaped and filled with an inert material. Single-sitting root canal treatment has become one of the fast advancing offshoots of endodontics.

TECHNOLOGY & INFRASTRUCTURE

Some of the latest equipment featured in our hospital:

- Intra Oral Camera
- RVG (Digital RadioVisioGraphy) (Dental X-Ray)
- Ultrasonic scaler
- State-of-the-art dental chair & sterilization equipment
- Bedside Dentistry - We are well-equipped to provide comprehensive treatment to our admitted in-house patients
