Respect *for* Life  
सम्मान जिंदगी का

At Sir H. N. Reliance Foundation Hospital and Research Centre, our Department of Anaesthesia and Pain Management provides the best possible patient care by fostering excellence in anaesthesia and pain medicine. We not only ensure our treatment is safe and efficacious, but also invest every effort to make the hospital stay comfortable for patients.

Indeed, at Sir H. N. Reliance Foundation Hospital and Research Centre, we don't just treat the body, we go further: we respect life.

## ANAESTHESIA AND PAIN MANAGEMENT: Level 3, Heritage, 8 am - 8 pm

# TECHNOLOGY & INFRASTRUCTURE

- State-of-the-art operation theatres with the latest US-FDA approved digital anaesthesia machines with digital monitoring facilities
- Latest Ultrasound machines and Fluoroscopy machines to assist with technically challenging procedures, ensuring their success, safety and efficacy
- Strategically planned to provide round-the-clock, highly specialised service with well-experienced faculty dedicated to anaesthesia and peri-operative medicine
- Affordable, quality care with a humane touch

# SERVICES

## Anaesthesia Services

We provide anaesthesia services for Orthopaedics, Cardiac, Oncology, Urology, Paediatric, Obstetrics, ENT, Transplant, Neurosurgery and other specialities.

- Day Care Services to facilitate management of patients, who return home on the day of surgery
- We provide anaesthesia/sedation for procedures/diagnostic studies, such as CT, MRI etc.
- Patient's pre-operative assessment and evaluation to reduce anxiety associated with surgery and to address patient queries
- Surgical emergencies at all hours of the day are effectively dealt with by our competent team

## Acute Pain Services (APS)

- Pain assessment occupies 5<sup>th</sup> position on the daily charting of vital signs - this explains the significance we allot to pain management
- Our APS team includes a senior anaesthesiologist and a pain nurse, who are available 24x7
- Our team approach is a collaboration involving the concerned surgeon, physician and rehabilitation experts
- APS covers post-operative patients, painless delivery, trauma pain, burn pain, and any acute onset pain
- State-of-the-art pain interventions are carried out under one roof.
- Ultrasound and Fluoroscopy machines to enhance the quality of procedures are available
- The latest drug delivery systems are available at our centre

## Labour Analgesia (Painless Delivery)

We believe that a painless delivery is the 'right of every expecting mother'.

- 24x7 availability of affordable, safe and effective pain relief for all expecting mothers
- We work cohesively with obstetricians to form an integrative team approach to labour and delivery
- We offer 'walking epidurals' during labour ensuring safe and painless delivery

## Chronic Pain Services

Multidisciplinary team of Orthopaedics, Neurologists, Oncologists, counselling experts and Radiologists provide comprehensive services to reduce pain, suggest coping strategies, improve function and enhance the overall quality of life.

- We encourage active patient involvement in their treatment
- Online/telephonic appointment system to minimise patients' waiting time
- Located strategically between Sports Medicine and Rehabilitation floors, with a dedicated consulting/examination room for patient and family counselling
- Latest technology vis-à-vis pain interventions and drug delivery systems are available
